General Contractors It's how you finish.

If you're a general contractor or builder, you're up against a tight schedule. And if you're scrambling to find workers or to get subcontractors to return your bids, you're in trouble.

Relax. We've got you covered — with the right contractor for your project. Right now.

Here's how The Finishing Solutions Network helps you ...

1) Meet Aggressive Schedules

Save time and ramp up faster when you tap our network of more than 7,000 qualified contractors and 110,000 crafts people.

We've done the heavy lifting for you — our people are pre-screened, trained, licensed, bonded, insured and experienced in the paint, wall covering, glass and floor covering trades.

2) Lower Costs with Higher Productivity

Our professionals are among the most productive anywhere. Output per hour is 24% higher among our workers than non-credentialed, untrained workforces, according to research at Harvard University and the University of Maryland.

And the productivity of our workers on commercial and retail projects is 31% to 51% higher than less-trained, less-experienced workers, according to U.S. Labor Dept. research.

3) Save with Safety

Safety saves lives — and money. That's because our safety standards reduce liability, increase productivity, and lower expense modification (MOD) rates for you.

Our rigorous training programs include OSHA 10 and 30, Ladders and Scaffolding, Aerial Work Platform, Fall Protection, Confined Space and more.

What's Your Perfect Fit?

Our Perfect Fit System™ matches you with the contractors and workforce to get your project done right — from start to finish.

A professional from The Finishing Solutions Network is ready to assist you now — in person, by phone, or online. To find a contractor who's your Perfect Fit, call 410.564.5876 today or visit www.FinishingSolutionsNetwork.com

Get the **BEST CONTRACTOR** for your construction, maintenance, or installation project.

Owners/Managers

Fill your space faster.

If you're a facility owner or property manager, you're pulled in two directions at once. Your tenants want a beautiful space, fast turnaround, reduced budgets and remarkable service.

You want a space that keeps ideal tenants in your building, and meets all specs and codes. You also want fast turnaround, reduced budgets and remarkable service.

Here's how The Finishing Solutions Network helps you ...

1) Right Start

We ask questions that others don't, to deliver results that others can't. The average experience of our work force is 15 years, so you can be confident that your exact requirements are clearly defined.

Then, using our Perfect Fit System™, one of our professionals meets with you — in person or by phone — to find the ideal contractor for your project.

2) Right Work

Don't take chances with a cut-rate workforce that can't complete your project. Our experienced professionals often work 50% faster than untrained laborers. Your benefit? Lower total cost.

3) Right Results

Your building speaks volumes. Smooth walls, clean lines and tight wall covering all tell prospective tenants that your facility is a cut above the rest.

First impressions can fill your space faster ... or cost you dearly. Which do you want?

Architects/Design

We finish what you start.

If you're an architect, designer, or industrial engineer, we can make your plans a reality. And no matter how early you are in the design and spec writing process, the best time to contact us is now.

Not only can we offer you qualified contractors and workers who meet your specifications on every part of a construction project (including LEED) ... we're also a trusted technical resource to design professionals.

You've got questions about manufacturers' specifications, certifications and other areas. And we've got answers.

Here's how The Finishing Solutions Network helps you ...

Our contractors have completed projects of every size and scope, including:

- Local Office Space
- Hospitals
- Academic Research Facilities
- Colleges and Universities
- Energy Plants
- Landmark Buildings
- Bridges and Water Towers

How do we do it? We partner with manufacturers and architects to master the latest specifications and tools, which gives you a big advantage in quality.

In addition, our 7,000 specialty contractors put their teams through extensive safety training that includes:

- OSHA 10 and 30
- Ladders and Scaffolding Safety
- Fall Protection
- Aerial Work Platform
- And More

About The Finishing Solutions Network

Our network gives you access to more than 7,000 qualified contractors in the flooring, paint, wall covering, drywall, glass and many more finishing trades. And there's no cost to tap our expertise, define your project, and find your ideal contractor, with our Perfect Fit System™.

Join thousands of general contractors, property owners and managers, designers and architects who have hired our professionals in the U.S. and Canada.
